History Despite having been around since 1991, Photoshop's history is relatively short. Photoshop only became widely popular after Apple rolled out Mac OS X, a software program that had been developed in-house for the Mac, which at the time was used by graphic designers, including Mac users. All of Mac's major software developers found it necessary to develop a replacement for Mac's original program, Photoshop. Adobes' version, named Photoshop, was done in six months, but was well received by the public. These developers were among the biggest names in computing, including several Apple engineers who had transferred to Adobes' team when Apple bought the company. When Photoshop was released, it was received very well. Before it was even officially released to the public in March of 1994, it was already the number one application on the Mac App Store. After its release, Photoshop quickly caught on with both the public and Apple. This version of Photoshop featured a new "Classic" user interface. This interface helped the software stand out from Apple's new and improved Finder, which launched with Mac OS 8. It was also the very first program to support newer graphics formats. Using this, the application was able to edit pictures in the early 1990s, which made it very popular. Adobe continued to work on Photoshop over the years. After this version of Photoshop was released, the developers also began to work on a number of other software applications, including Adobe InDesign, Adobe Illustrator, and Adobe Acrobat. Following this launch, Adobe continued to make Photoshop even better. The application received a new interface in version 4.0, which many people said made it look like a real operating system. With version 4.5 in 2002, the developers again changed the program's look. Versions Along with new applications, Photoshop also had many changes in the versions released, starting with version 1.0 in October 1992. The company continued to add features, such as the ability to create layers that would allow multiple pieces of content to be placed on top of each other. Currently, a lot of people use Photoshop for multiple applications. Usually, these people do not put a lot of time into Photoshop, so are better off using a program that is made more for what they need. Photoshop is now in its version 9.0, which was released on January 25, 2010. This version has added a lot of features, including the ability to convert photos to 3

Monday, August 12, 2011 I do have a new album, 25 Days of Sundays, to be released on October 7th. The cover art is by the talented Joy Vainer, who knows he will get a special little thank you for coming up with one of my favorite graphics. This one has a distant, small, wispy figure looking across a sea of clouds. He or she, I have no idea. And for what it's worth, the title of the album comes from the Scottish minister John Hutchison, who was writing a book about how the Sabbath and the Lord's Day were essentially one day. I love this album! so lyrical and so personal. I wish I had read this album's review sooner so I could have got it for Christmas and been so in the mood for Christmas. Thanks so much, Miss Fluffi again! The photograph at the top is lovely. I did a bit of research - and it has been noticed before - that Colin Edwards, who some will know as the World Time Trial Champion, is a closet-frontier traveler. It's also noted here: George, what an amazing album of songs. You have mastered the art of songwriting, and I am so happy I found this blog. I had no idea you wrote music, and I can't wait to see you on 11/11. I think I'm going to be alone on the day, but I look forward to sharing your song "Someday" with my little girl. She will understand what you are trying to convey in that song even if she can't yet talk! I'm her mother and I'm supposed to know that stuff. You know, just because she can't talk or walk doesn't mean she doesn't know anything. And do I love Joy's art. What a wonder to be able to see it with the back of your head. And now that your 25th birthday has come and gone, what will you do with yourself, given that you are already 25? About Me I live in New York City, but I love to travel and explore and hope that you will find the time to do the same. Here you will find photos, reviews and articles on restaurants, albums, books, trips and other things I like. Hope you like it and if you have a question or comment, please write me at Vickyinthecity
