What's new in Fantasy Grounds - Mini-Dungeon 009: Tiikeri's Revenge (PFRPG):

By Chris Phinney, (C) Chris Phinney My Vengeance on Your Skeleton Crew Dijk's Vengeance A Maze of Goblin Skeletons A Puzzle of Bone Bridges A Forest of Goblin Skeletons Evil came to Tiikeri's mansion. It was a shock to the system, really, for he had been so careful. A few rabbits, a turkey, a cat, some small doves could be found roaming the grounds. Now, however, he had moved his audience inside and there were at least six or seven skeletons dressed up in rather scant clothing that Tiikeri had accumulated for the occasion. There was even a skeleton that had fashioned itself into a walking skeleton. Something was up. Glancing around the room, it appeared that the goblins had packed the place pretty well. Two of the goblins were occupied against the wall beneath the only window. They seemed to be speaking to each other angrily with occasional grunts back and forth. Three or four of the other goblins were busy collecting the coins and gems that had fallen from the players' bags, even some small silver nuggets that had poked out from the bags. One player was hunkered down on the flagstones, picking items out of the sand. Another player was rolling dice and mumbling quietly to himself. Still another player was over by a locked door, staring at the door as if he expected it to materialize and open up. Oh, but it would come. Tiikeri knew it. It would come. Evil was an element of which he could not control, yet he would wager that he knew more about it than anyone else present in this room. It was a cursed house and when the time came for vengeance, his enemies would not be able to run away from Tiikeri. He would have them. And they would be vanquished. - Create folder for the game and change the name to 'adventures'. - Open a command prompt as admin and enter: git clone the path where you want the game to be and replace all of 'adventures' with the name of that folder. - Enter the path where the software is located and replace all of 'adventuressolutions' with 'adventures solutions'. - After the game and utilities have been downloaded and cloned, we are going to be making a copy of the program into a folder in the 'Windows downloads' folder. - On the 'norton down' screen, scroll down to programs>Windows 7>Norton Uninstaller- Hit continue on this screen and update all programs that Windows needs. It may take a little while. - Once all updates have been installed, click on 'finish updating' on the bottom of the window. This will not close out of the window, so just type in the 'create shortcut' box 'norton nwsetup.exe' and hit enter. The installer should close. Run nwsetup.exe as admin. Hit next. - Next, you'll be asked if you want to install the trial. Click 'Install'. - Next, you'll be prompted to either create a new password and log into your wallet, or log into a wallet you already have. The latter is good if you have a third party wallet already set up, but your wallet will be locked when you close the Norton window. If you just created a new bank and that is all you're doing, you can skip this screen. Click 'Create and open wallet'. - Once the wallet is created, click 'finish setup'. The bank is set up and ready to go- Save your new bank.
