Generate& .Q: Proving a  
series converges I am

---

doing some self studying  
 in real analysis. I am  
 trying to prove that:  

$$\sum_{n=2}^{\infty} \frac{\sqrt{2^{2n}}}{n}$$

converges. I have tried to  
 use ratio test. However, I  
 get a product of ratios  
 which results in an  
 expression of the form:  $\frac{\frac{2^{2n+1}}{(n+2)(n-1)}}{\frac{2^{2n+3}n^2}{(n+2)(n-1)}}$

---

$(n+1)(n-1)$  } }  $\$ \$$  But I don't see how this can be further simplified. Am I missing something? Any help would be appreciated. A: The ratio test just asks you to choose two appropriate lower and upper summation bounds for the sum. In this case they can be  $n$  and  $n+2$ . The denominator clearly converges. The

---

numerator can be simplified quite easily:

$$\frac{2^{2(n+2)}(n+2)(n-1)}{2^{2n+3}n^2} = \frac{(n+2)n(n-1)}{n^2} = \frac{n^2+2n^2-n^2+2n-n^2+4n-2}{n^2} = \frac{3n}{n^2+4n-2}$$

couples to legally marry. In a 5-4 decision, the Supreme Court ruled that states can no longer use the Defense of Marriage Act to ban gay and lesbian couples from legally marrying in states where same-sex marriage is legal. "This is a huge victory for our families and for our nation," said Edie Windsor, widow of Thea Spyer. "It's just more evidence of how far we've come as a society since the Defense of Marriage Act was passed in 1996." "I am thrilled to see that the Supreme Court has reaffirmed the equal dignity and human rights of LGBT Americans," said James Esseks, director of the ACLU Lesbian Gay Bisexual Transgender & HIV Project. "This is a landmark decision that codifies our nation's long-standing view that gay and lesbian Americans deserve the same constitutional rights as heterosexual Americans," said Chad Griffin, senior vice president of the Human Rights Campaign. "We applaud the Supreme Court for reaffirming the underlying equality of LGBT Americans and we look forward to seeing this decision implemented on the ground."
